Intelligent Furniture Solutions

Aaztec has been at the forefront of pioneering new techniques in the design, manufacture and installation of high quality cubicles and washrooms since 1992. Our ability to tailor a washroom solution to suit the exact needs of a client environment is unrivalled and today our customers span all industry sectors including:

- Retail
- Hotel
- Education
- Transport
- Leisure
- Public Sector
- Healthcare
- Manufacturing

Aaztec offers a full design consultancy service to ensure every cubicle or washroom fits the customer's exact needs in terms of look, feel, materials and durability. We can also advise on matters such as DDA compliance and provide finishes and fittings to complement and enhance any design or colour scheme. Our latest eco-friendly ranges harness recycled materials to help sustainability and the environment.

> BSF Case Study

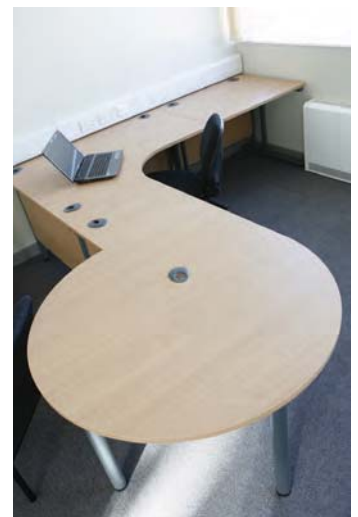

Crawshaw School, Leeds

Aaztec are proud to have been the company selected by Interserve Project Services Limited to supply and install the furniture at Crawshaw School, Pudsey, Leeds.

The specification for Crawshaw School includes many furniture components including desks, tables, meeting area chairs and storage solutions. We use a wide range of laminates and materials in various colours and finishes.

Chris Brown, Managing Director of Aaztec, confirms the company's commitment to the Building Schools for the Future programme and recognises the importance of building long term relationships with main contractors involved in this worthwhile scheme.

- Tray Units
- Cupboards
- Desks
- Bookshelves
- Pinboards
- Chairs
- Stacking Tables
- Shelving
- Teachers Desks
- Benching
- Upholstered Seats

Our consistent approach to design and installing complete educational environments is reflected in the fact that we are supplying and installing in an ever increasing number of schools throughout the country.

The Leeds' Building Schools for the Future (BSF) programme scooped two prestigious awards at the first national annual awards to celebrate the transformation of education - **Best Operational LEP** and **Innovation in ICT** awards.

For more information about this project please call 01423 326400 or email sales@aaztec.com

Storage Solutions

> **BSF Case Study**

Priesthorpe School, Leeds

Design is an important factor in any project. However, durability, practicality and ease of maintenance also feature heavily in this project. Trespa laminate is the ideal material to use in demanding environments and has been utilised in science classrooms and teaching areas at Priesthorpe School.

Architectural and interior designer, Watkins Gray International (WGI), created a magnificent blueprint for this BSF (Building Schools for the Future) project. Creating an environment where both staff and students can benefit from their surroundings in a positive and constructive way.

Aaztec was awarded this contract as a result not only of recommendation but on the basis of our high standards of workmanship, quality, service and health & safety standards.

For more information about this project please call 01423 326400 or email sales@aztec.com

● 500mm deep tall unit. Note! Tall units have 1 fixed central shelf and two loose. ● 500mm deep base unit ● 320mm deep wall unit ● Unit available as mobile
 The above Matrix will suit most permutations. Unit depths and heights can be adjusted to suit specific client requirements. For units not displayed please ask for further details

To generate a code simply decide if the unit is to be fixed, wall hung or mobile. Select a unit type complete with its sizes and add lock or glass.

Lead time (weeks) — Production code — Unit type Prefix with "T" fall tall units — Height — Width — Depth — Lock — Glazed door(s)

F - Fixed W - Wall M - Mobile

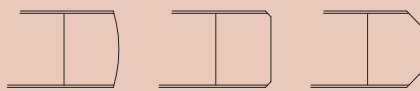

F A 4 - S C T D - 7 5 0 - 5 0 0 - 4 8 0 L G

Note. Many other colours available. Please ask for details.

Hardwood leading edges
Core material from MDF or Chipboard
Laminated and balanced

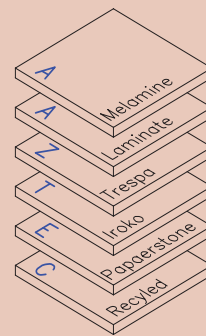

Trespa leading edges
Core material from MDF or Chipboard
Laminated and balanced

Lacquered leading edges
Core MDF only

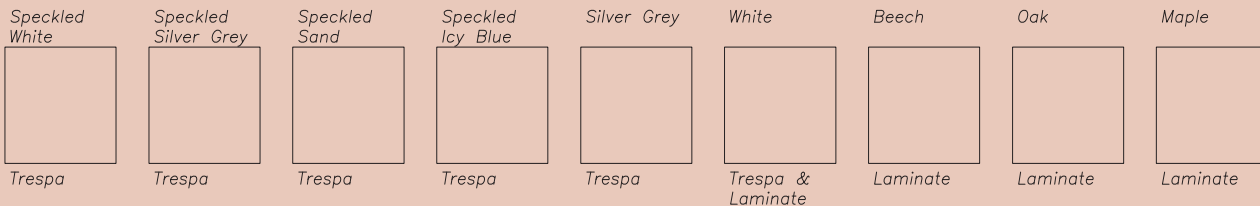

Lipped leading edges
Solid core Trespa

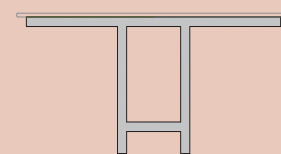

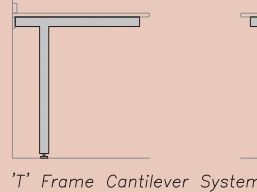

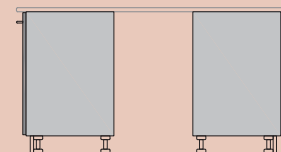

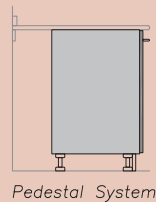

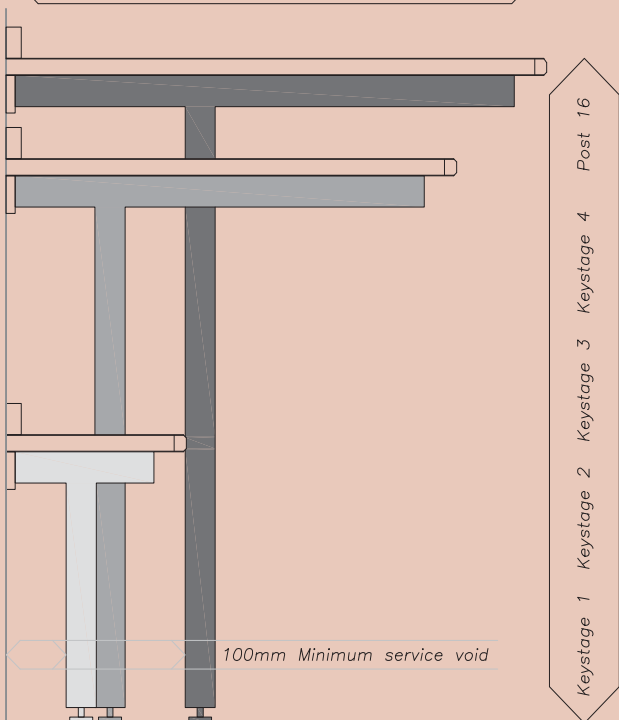

A choice of MDF or chipboard core (except lacquered edges) laminated with and balanced.

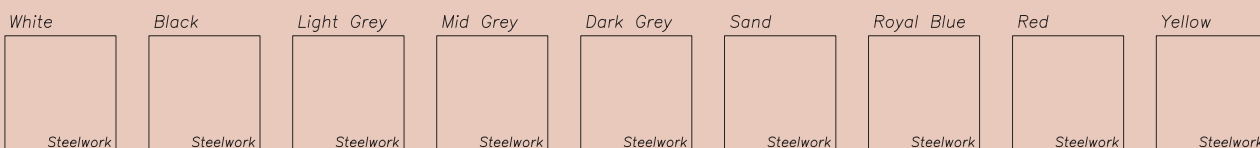

Note. Many other colours available. Please ask for details.

Peninsular and Island depths from 300mm to 1500mm Standard. 2000mm deep VDU tops
Wall depths from 300mm to 900mm in all keystages

All ranges and systems have been carefully designed to ensure they comply to the latest guideline, BS EN 1729. It is possible to design a sitting, standing or even poseur height worktop to suit any environment from general classrooms to specific rooms such as science laboratories, food technology and resistant materials. The designs and systems are compatible and interchangeable almost seamlessly, enabling the pedestal unit and worktop system changing to a 'C' 'T' or 'H' frame system (see above) within the same worktop run. All steelwork systems can accept suspended carcass. All though comprehensive this is not exclusive. If you do not see anything that you require please ask for details.

Note. Many other colours available. Please ask for details.
